June 11, 2020

**RE: New Hampshire FY 2019-2022 Statewide Transportation Improvement Program
(STIP) Amendment #4**

Dear Commissioner Sheehan:

The Federal Highway Administration (FHWA) has completed a review of New Hampshire's FY 2019-2022 STIP Amendment 4 and supporting documentation submitted on June 5, 2020. Through New Hampshire's interagency consultation process and further discussion among the federal agencies including the Federal Transit Administration (FTA) and the United States Environmental Protection Agency (EPA), FHWA has determined that this Amendment contains only project modifications specific to our agency, and requiring no conformity determinations under the Conformity Rule (40 CFR 93.104).

Thus, this Amendment can be reviewed and processed by FHWA on behalf of both FHWA and FTA, per requirements included in the September, 2018 Memorandum Of Agreement (MOA) between the Federal Transit Administration, Region I, and The Federal Highway Administration Division Offices in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

FHWA is making the following determinations:

- Projects in the 2019-2022 STIP are based on a planning process that substantially meets the requirements of 23 USC 134 and 135, 49 USC 5303 and 5304, and Subparts A, B, and C of 23 CFR 450, and other applicable requirements.
- The metropolitan TIPs are based on a continuing, comprehensive transportation planning process carried on cooperatively by the State, Metropolitan Planning Organizations (MPOs), and transit operators in accordance with the provisions of 23 USC 134 and 49 USC Sections 5303, and subparts A, B, and C of 23 CFR 450.

Findings:

FHWA and FTA appreciate that NHDOT continues to include a status report on Findings and Recommendations from our April 24, 2019 2019-2022 STIP approval action (and/or subsequent 2019-2022 STIP Amendment approval actions), and we request that you continue providing this status report information with any subsequent 2019-2022 STIP Amendments.

We note that the Department has continued to include documentation in STIP Amendment 4 addressing performance based planning and programming requirements, including New Hampshire's State Biennial Performance Report. Matrices indicating which projects support performance measures related to Safety, Pavement Condition, Bridge Condition, Congestion/Air Quality and Transit performance measures are helpful.

FHWA and FTA appreciate that the Department has committed to constraining the anticipated 2021-2024 STIP by funding category, and to ensuring that the 2021-2024 STIP will include updated funding category nomenclature in its financial plan and financial constraint documentation. While acknowledging federal aid eligibility and transfer flexibilities, and bottom line annual financial constraint by year in New Hampshire's current STIP and TIPs, we look forward to the Department and MPO planning partners developing and demonstrating annual financial constraint by funding category for the anticipated 2021-2024 STIP and TIPs, and we also look forward to the Department and MPO planning partners using the most recent funding category nomenclature in your 2021-2024 STIP and TIP financial plan and financial constraint documentation, including use of "STBG" versus "STP" for example.

The May 15, 2015 Stewardship and Oversight Agreement (SOA) between the Department and FHWA includes various performance indicators with reporting frequencies and targets. One of the performance indicators is STIP Performance, documented as the percent of construction projects listed in the baseline STIP that advanced in the expected federal fiscal year.

As noted in the FHWA and FTA 2019-2022 STIP approval action, values for the years 2016 and 2017 have been reported as 59% (2016) and 65% (2017). FHWA and FTA have previously requested that the Department provide year-end values for the years 2018 and 2019 as soon as practical, but no later than the Department's request for STIP Amendment 3 approval. On March 18, 2020, the Department provided FHWA with New Hampshire's 2019 STIP Performance Measure Report. On March 18, 2020, FHWA responded with some clarifying questions, and a request for the 2018 performance indicator percentage also, which was not provided. On April 21, 2020, the Department provided responses to FHWA's clarifying questions as well as the 2018 performance indicator percentage as requested. Values for the years 2018 and 2019 have been reported as 65% (2018) and 69% (2019), establishing a positive, upward trend of 10% improvement over four years of measurement. FHWA and FTA look forward to continued progress toward the 80% target value listed in the SOA.

Finally, on April 21, 2020, FHWA transmitted recently released Q and A's on Virtual Public Involvement (VPI) to NHDOT and planning partners. FHWA and FTA are aware that some States and MPOs are looking to utilize VPI technologies and techniques for public participation activities related to metropolitan and statewide transportation planning under applicable statutes (23 U.S.C. 134-135), to satisfy public meetings provisions while the Department of Health and Human Services (HHS) determination that a public health emergency related to COVID-19 is in effect.

With awareness that VPI activities are underway, FHWA and FTA would strongly encourage both NHDOT and New Hampshire's MPOs to update your public involvement/public participation plans/procedures as needed, (and consistent with the required 45-day comment period), to ensure that VPI activities are incorporated in as timely a manner as possible. The use of VPI techniques in this context needs to also be consistent with New Hampshire laws, policies, and procedures, as well as MPO bylaws, etc.

Conclusion:

FHWA on behalf of FTA has determined that FY 2019-2022 STIP Amendment 4 substantially meets requirements and is hereby approved. This approval action for New Hampshire's STIP is not an eligibility determination for use of Congestion Mitigation and Air Quality Improvement (CMAQ) funds or other federal-aid funded projects that are included in the STIP.

We remind NHDOT and New Hampshire's MPOs that consistent with 23 CFR 450.210 and 23 CFR 450.316, they must demonstrate explicit consideration and response to public input during the development of their various statewide and metropolitan planning products, and seek out and consider the needs of the traditionally underserved, such as low-income and minority households.

FHWA and FTA continue to request that all New Hampshire's MPOs post their updated TIPs, MTPs and Public Participation Plans on their websites, and likewise request that the State of New Hampshire post the approved STIP, statewide long-range transportation plan, and their updated Public Involvement Procedures and documentation of their Non-Metropolitan Local Officials Consultation Procedures on the NHDOT website.

A copy of this letter is being provided to the Executive Director of each MPO and rural RPC in New Hampshire. If you have any questions, or for further assistance, please contact Leigh Levine, FHWA at (603) 410-4844.

Sincerely,

**PATRICK A
BAUER**

Introduction

The Fixing America's Surface Transportation (FAST) Act was signed into law on December 4, 2015. The FAST Act builds on the program structure and reforms of MAP-21. The requirements as codified in Title 23 Part 135 and 49 Part 5305 of the United States Code (USC), stipulate that each state will develop a continuing, cooperative, and comprehensive statewide multimodal transportation planning process, including the development of a Statewide Transportation Improvement Program (STIP). In New Hampshire the STIP is updated every two years and is developed through a coordinated statewide and metropolitan planning process.

The metropolitan planning process, as defined in 23 USC Parts 134 and 49 USC Parts 5303, is carried out by the four Metropolitan Planning Organizations (MPOs) in New Hampshire: Nashua Regional Planning Commission (NRPC), Rockingham Planning Commission (RPC), Southern NH Planning Commission (SNHPC), and Strafford Regional Planning Commission (SRPC). Each of the MPOs has adopted a Metropolitan Transportation Plan (MTP) and a Transportation Improvement Program (TIP), and with each TIP amendment the MPOs amend their MTP for consistency. The MTPs were developed and approved in accordance with 23 Part 450.322 of the Code of Federal Regulations (CFR) and include a financially constrained program of transportation projects within their regions. The MPO TIPs are consistent with the regulations outlined in 23 CFR §450.324, including requirements related to financial constraint, and have been incorporated into the 2019-2022 NH STIP.

Following the 2010 Census the Nashua Regional Planning Commission was also designated as a Transportation Management Area (TMA). New Hampshire Department of Transportation (NHDOT) and the three MPOs included in the Nashua Transportation Management Area (TMA) and Boston Urbanized Area (UZA) are collaborating to develop agreements and policies to ensure compliance with the federal requirements for planning and programming of projects. The three MPOs included in this collaboration include NRPC, SNHPC and RPC.

As of March 6, 2015, the Environmental Protection Agency (EPA) published a final rule (80 CFR 12264) which included the act of revoking the 1997 Ozone NAAQS (for transportation only) resulting in the elimination of nonattainment/maintenance status for that standard. This ruling re-designated the Boston-Manchester-Portsmouth, NH area to "attainment" status. The cities of Nashua and Manchester are still maintenance areas for carbon monoxide. Any applicable findings of conformity to the NH State Implementation Plan of all MPO TIPs and MTPs have been made and documented through a process consistent with the requirements of 23 CFR Part 450 and 40 CFR Part 93.

Every two years the State of NH prepares and adopts a Ten Year Transportation Improvement Plan (10-Year Plan). The recently approved 10-Year Plan (July 2018) includes a list of projects for the ten-year period from 2019-2028. Every Ten Year Plan is developed to be consistent with the framework established in the NH Long Range Transportation Plan (LRTP) 2010-2030. The LRTP outlines a broad strategic direction for the State and for the Department of Transportation for a 20year time period. The LRTP was developed in accordance with the requirements of 23 USC, Part 134 and is a federally approved plan.

Building upon the LRTP, the Ten-Year Plan process further defines and identifies specific transportation projects which will be funded with various funding sources. The process to develop the 10-Year Plan involves substantial input from the public, elected officials, transit operators, state agencies, regional planning commissions, and MPOs.

Critical to the TIP and the TYP process, is the acknowledgement and documentation to show that transportation projects reflect reasonably anticipated revenue estimates to funding the proposed projects. Demonstrating fiscal responsibility is required, and further demonstrates the importance of addressing national and state priorities, performance measures and meeting all applicable federal requirements.

The 2019-2022 NH STIP has been developed through a coordinated statewide and metropolitan planning process that is consistent with the requirements of 23 CFR §450.216. All projects designated as regionally significant by the MPOs and through Interagency Consultation (IAC), regardless of the funding source, are included in the STIP. All surface transportation projects that utilize resources from programs funded under Title 23 USC and Title 49 USC Part 53, with the exception of the programs identified in 23 CFR §450.216(g), are included in the STIP. The STIP has been constrained to the available financial resources for 2019 and the resources that are reasonably anticipated to be available through 2022. To more accurately depict the financial status of the STIP, inflation at a rate of 2.8% is included for projects, satisfying the year of expenditure requirement in 23 CFR §450.216(l).

In accordance with the NH STIP Revision and the MPO TIP Revision Procedures, a series of minor revisions to the NH 2019-2022 STIP and MPO's TIPs have been approved during the development of Amendment 4. Through an agreement with Federal Highway Administration (FHWA) NH Division, Federal Transit Administration (FTA), the MPOs, and other Interagency Consultation Partners, those minor revisions will be incorporated into the final Amendment 4 Report.

Financial Plan

The STIP Financial Plan has been prepared to satisfy the requirements of 23 CFR §450.218. Pursuant to these federal regulations, the STIP shall include projects, or identified phases of projects, only if full funding can reasonably be anticipated to be available for the project within the time period contemplated for completion of the project. Additionally, in the current and the next future years of the STIP, funds for projects located in the nonattainment or maintenance areas of NH must be committed or available.

The financial plan outlines funding sources and other relevant information about the specific projects or programs. The STIP Financial Plan serves to convey relevant information about the projects, so that the public process is transparent and provides the public an opportunity to understand the financial resources required for the projects identified for funding.

As NHDOT strives to meet the financial challenges of the State's transportation system, all potential revenue sources will continue to be evaluated. In the event that new financing mechanism are introduced or used to meet the funding requirements of any Federal-aid projects, the STIP will be updated accordingly.

The STIP documents the various sources of funding to be utilized which may include but is not limited to federal dollars, match amounts, state resources from the Highway Trust Fund and those provided in the budget of the State of NH, turnpike revenue, and local and private revenue sources.

The NHDOT STIP Financial Constraint process is based on the following principles:

- All Federal funds obligated will be appropriately matched and the matching funds are indicated in the constraint analysis and at the project level;

- Federal apportionments for federal fiscal years 2019 through 2022 are based on figures in the Status of Funds published by FHWA at the time the STIP action is drafted.
- All projects funded in the STIP are included in the analysis of STIP financial constraint;
- Stand-alone projects with funding authorization under a Programmatic (Grouped projects) are made available to RPCs for inclusion in their TIP. Grouped projects have similar function, work type, or area; and are selected using competitive selection, inspection, or data decision process.
- State match budgeted for FY 2019-2022 (as discussed and agreed to by NHDOT and FHWA) primarily in the form of Turnpike Toll Credits;
- Matching funds provided by municipalities and other sources will be committed by those entities before any work may begin on the project;
- Advance Construction (AC) may be used at the State’s discretion in accordance with Title 23, Section 115;
- Turnpike Toll Credits may be used to provide the non-federal match requirements of a project provided that credits are available.
- Grant Anticipation Revenue Vehicle (GARVEE) bonds. GARVEE bonds or other bonding mechanisms may be used to fund specific projects within the STIP where those funds can be considered to be reasonably anticipated to be available or are available.
- To estimate year of expenditure dollars for future years in the STIP, an annual inflation rate of 2.55% is applied for each year beyond the current. The NHDOT developed an annual estimated rate of inflation of 2.55% with the concurrence of the FHWA Division Office. That rate is a rolling rate based on historical trends over a 10-year period. Similarly, in the 2019-2022 STIP that rate is applied to all projects two fiscal years starting with the current estimate and is compounded annually. For projects planned as advance construction, the entire construction cost is inflated in the year of advertising and not compounded in each year of anticipated conversion.
- By funding category, apportionment balances from previous years as well as the transfer flexibility inherent within SAFETEA-LU and continued with the FAST Act will be utilized as necessary.

Federal Resources

There are two primary federal sources of revenues. These include apportionments/obligational limits and congressional earmarks. Each is briefly described below.

The majority of federal resources are allocated to the states through annual apportionments outlined in the most current federal transportation bill, which currently is the FAST Act. In addition to the apportionment, the federal government establishes on an annual basis and in accordance with Public Law 112-141, a “limit on obligations” that functions as a ceiling on the amount of funds that may be requested in a fiscal year. Figure 1 outlines the trend over recent years for both apportionments and limitation on obligations for NH in the core apportioned programs.

Annual apportionments are designated to stand-alone projects and through programmatic projects. Typically, these funding sources are used for a specific type purpose or program. Funding from these programs is typically contingent upon successful application for a specific project or projects. As there can be no reasonable assumption made that an application will be successful, FHWA guidance indicates that these funding sources should not be considered “available” or “committed” for purposes of financial constraint. The 2019-2022 NH STIP has been developed to be consistent with the guidance and does not include any revenue assumptions for such programs.

The second source of revenue for projects from the federal government is made available through congressional earmarks. Earmark funds are not subject to many of the limitations that normal apportionments are and may be moved between fiscal years based on availability and project schedule without adherence to the limitation on obligations. In fiscal year 2016, NHDOT, working with FHWA, reviewed Earmarks for repurposing. Earmarks signed into law prior to September 30, 2005, and had no funds expended or the project was complete would be eligible for repurposing to another project within 50 miles of the Earmark project as long as the Earmark funds were not replacing obligated funds. As such, the 2019-2022 STIP was developed with the assumption that earmark funds that have already been designated or repurposed will be available for the identified project when the project is ready to move forward. Federal guidance also specifies that future earmarks that have not yet been approved by Congress may not be assumed as revenue in a STIP. Consistent with that guidance, the NH STIP includes only approved and designated earmark funds.

Figure 1 – Apportionment & Obligation Limit

State Resources

The state budget process and legislative process is important to the development of the NHDOT Ten Year Plan, and the planning of transportation improvement projects.

The State budgeting process is outlined in the NH Revised Statutes Annotated (RSA). The state budgeting process outlines submittal dates for submitting budgets. A brief explanation of the deadlines of the state budgeting process is discussed below.

RSA 9:4 states that every state agency submits to the Commissioner of Administrative Services two budgets biennially for consideration: 1) an operating budget and 2) a reduction level expenditure estimate. For STIP planning purposes, the Fiscal Years 2019 - 2022 budget contains the best information NHDOT has available regarding anticipated state revenue, as well as total expenditures that are planned as part of the budget. If there are changes in the budgeted amounts within NHDOT’s budget for Federal-aid projects, then it will be appropriate for the STIP Financial Constraint to be updated, adjusting project schedules to meet the projected resources. Any project changes in the STIP would require appropriate amendments, including coordination with MPO’s, FHWA, FTA, EPA and other agencies as required.

The NH Legislative process affords opportunities to introduce proposed language for new laws regarding a variety of subjects, including funding. In 2014, New Hampshire Senate Bill (SB) 367 was signed into law. As a result of this legislative action the gas tax in New Hampshire was increased. SB 367 increased the gas tax and allowed for the issuance and payment of general obligation bonds (currently a repayment of a TIFIA direct loan) to widen I-93, and to provide additional funding for the district rehabilitation program, the district resurfacing program; the state bridge aid program; and the highway and bridge betterment program. The estimated revenue from SB 367 is shown below.

Estimated Revenue per Senate Bill (SB) 367

2019	2020	2021	2022
Total Resources	Total Resources	Total Resources	Total Resources
Available	Available	Available	Estimated
\$34,479,900	\$35,437,500	\$35,683,594	*\$35,683,594

*Revenue estimates may change due to the 2020 COVID19 Pandemic.

The NH budgeting process has three important transmittal dates. Each is briefly discussed below. On or before October 1st of all even years (October 2020 for the purpose of this STIP), an operating budget must be developed that shows maintenance expenditures necessary for the agency. Maintenance expenditures are defined as “the cost of providing the same level of service authorized and funded in the preceding fiscal year, incorporating changes in the population, economic conditions, and other factors outside the control of the accounting unit”.

On or before November 15th prior to each biennial legislative session, all departments of the state shall transmit to the commissioner of administrative services, a reduction level expenditure estimate for each fiscal year of the ensuing biennium for administration, operation, and program services, including costs for workers' compensation and unemployment compensation.

By June 30th of the following odd numbered year, the Governor and Legislature make the final recommendations and approvals of the agency budgets, based on their reviews, and the normal legislative process. Agency budgets are to be built from the bottom-up using a zero-based budgeting approach. With this zero-based budgeting approach, it is ensured agencies review all program areas. This should aid in prioritization, determining the effectiveness of programs, and identifying areas where efficiencies can be achieved.

Turnpike Toll Credits

Federal regulations (23 USC §120) allow a State to use toll credits toward the non-Federal match requirement of a project, provided that the project is listed in the STIP. These credits are based on toll revenues that are generated and used by public, quasi-public, and private agencies to build, improve, or maintain highways, bridges, or tunnels that serve the public purpose of interstate commerce. Such public, quasi-public, or private agencies shall have built, improved, or maintained such facilities without Federal funds.

To receive these toll credits, a State shall show that it has maintained the federal-aid eligible portion of the transportation system with non-Federal transportation capital expenditures in accordance with the given requirements. NHDOT has shown that it has met these requirements in the past, and has utilized toll credits to match federal funds. Consistent with existing practices, the 2019-2022 STIP identifies the use of toll credits by project and accounts for the use as part of the financial constraint information.

At the end of federal fiscal year 2019 NH had a balance of toll credits in the amount of \$197M; this amount far exceeds the 20% match required of the State. The total amount of toll credits for all four years of the STIP is \$147M. Identified at the project level in the STIP, NHDOT may coordinate with FHWA to use toll credits on a case-by-case basis in any of the STIP years. The use of this matching mechanism will be documented in the STIP as Amendments are published.

Federal Toll Credits

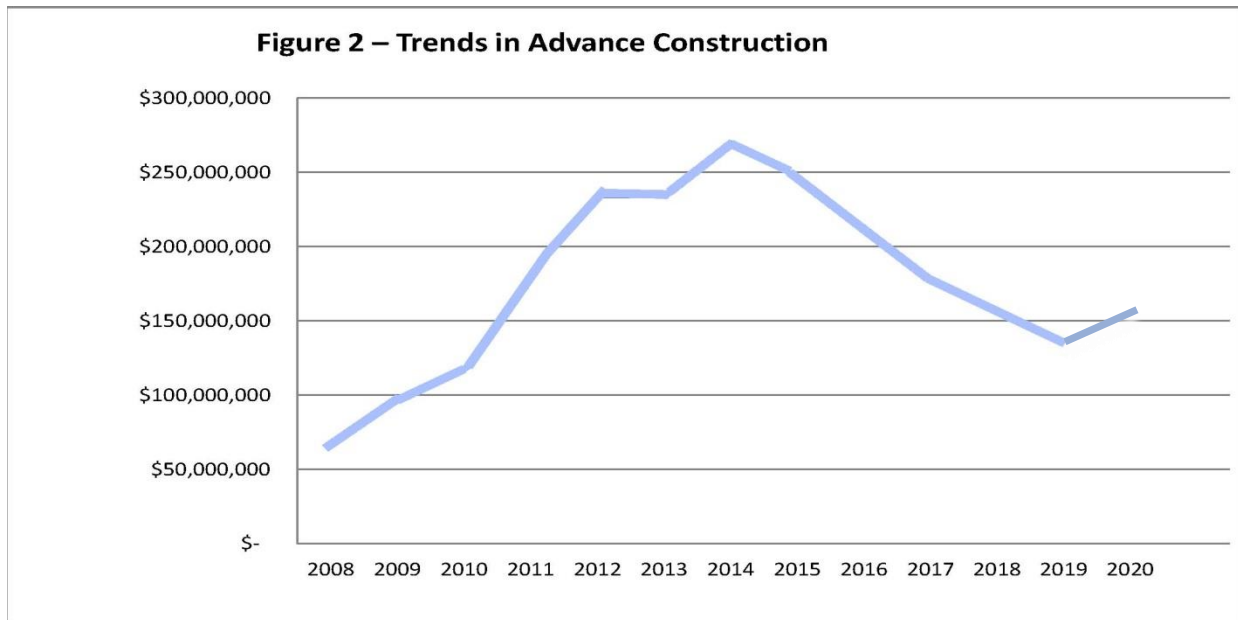

2019		2020		2021		2022	
State Resources	Total Programmed	State Resources	Total Programmed	State Resources	Total Programmed	State Resources	Total Programmed
Available	Programmed	Available	Programmed	Available	Programmed	Available	Programmed
\$33,023,637	\$33,023,637	\$40,010,016	\$40,010,016	\$37,930,246	\$37,930,246	\$36,506,640	\$36,506,640

Advance Construction (AC)

Advance Construction is a funding management tool which allows for accelerated project work time. NHDOT can incur costs on a project as long as it has been Advanced Constructed and submit the funds later to be federally reimbursed. The STIP must remain financially constrained if there are any modifications to the anticipated AC conversion schedules of projects.

The NHDOT has assumed a conservative approach for AC with a standing goal to ensure that conversions to Federal aid remain ahead of actual project expenditures. If planned Federal funding fail to become available, NHDOT would have to use non-Federal funds or suspend work on the project, which is why NHDOT has reduced Advance Construction totals in recent years. Figure 2 below shows NHDOT trends in using the AC management tool. Beginning in the summer of 2009 the NHDOT revised the process of AC to include preliminary engineering and right of way. All active projects were updated with the appropriate AC amount for all phases resulting in an increased AC balance.

Under the provisions of 23 USC Part 115(a) and as further outlined in 23 CFR §630, the State may utilize Advance Construction (AC) on Federal-aid projects with the approval of FHWA. Guidance from the FHWA Resource Center has indicated that the cumulative amount of AC should remain below 1½ times the annual apportionment of federal funds for FHWA programs. Advance construction is subject to approval from FHWA and will be tracked as normal Federal-aid projects are in the federal Financial Management Information System.

Turnpike Authority

On the turnpike system most capacity related improvements or system expansions qualify as regionally significant as defined in federal regulations. Pursuant to 23 CFR §450.218(h) a STIP must contain all regionally significant projects regardless of funding source. The determination of regional significance is made at the MPO level, or by the DOT in rural areas, with input through Interagency Consultation. As the 2019-2022 STIP contains all projects that have been identified as regionally significant, several projects on the turnpike system are listed.

Additionally, the federal regulations governing the MPO TIPs, MTPs, and the associated air quality conformity determination for nonattainment and maintenance areas, including 23 CFR §450.324(i) and 40 CFR §93, stipulate that the availability of funds must be demonstrated for all included projects. To provide information to the MPOs and to demonstrate financial constraint of the STIP, anticipated revenue and expenditures for the turnpike system have been documented in the Financial Constraint Summary tables. As illustrated in those tables, the turnpike system is financially constrained overall within each year of the STIP.

Statewide Maintenance and Operating Budget (Turnpike)

2019	2020	2021	2022
Total Resources	Total Resources	Total Resources	Total Resources
Available	Available	Available	Estimated
\$136,629,570	\$159,010,061	\$175,391,360	*\$175,391,360

*Revenue estimates may change due to the 2020 COVID19 Pandemic.

Bonds

Bonding is one of several financial strategies used by the State of NH to finance transportation improvements. The State of New Hampshire, through action of the NH Legislature, has the ability to issue and utilize Grant Anticipation Revenue Vehicle (GARVEE) bonds. A GARVEE bond is issued by the State with the presumption that federal funds will continue to be available to pay for debt service in the future. GARVEE bonds provide a short-term influx of funding to advance projects that may otherwise take many years to construct. GARVEE bonds may only be issued with the concurrence of FHWA.

A Memorandum of Agreement (MOA) is issued between the NHDOT, NH Treasurer, and FHWA to facilitate each bond issuance. GARVEE bonds have been issued for several transportation projects in NH. The State of New Hampshire has the ability to issue and use GARVEE bonds up to an amount of \$490M for construction associated with the improvement and expansion of Interstate 93 from Salem to Manchester, the replacement of the Sarah Mildred Long Bridge and any other federally aided highway project authorized by legislature. The NHDOT will be requesting authorization to use GARVEE bonds for construction of selected bridges over the Connecticut River.

The first GARVEE bond was issued in November of 2010 for the I-93 Corridor Projects totaling \$80M. An additional \$115M of GARVEE bonds were issued in 2012 for the I-93 Corridor Projects. The financial constraint information reflects the anticipated use of GARVEE funds for the I-93 Corridor Projects, including the applicable debt service costs. The project list identifies the construction cost of each project as well as the relative share of interest costs.

Transportation Infrastructure Finance and Innovation Act (TIFIA)

Transportation Infrastructure Finance and Innovation Act is a Federal credit program for major transportation investments. TIFIA was enacted in 1998 as part of the federal legislation (TEA-21). In subsequent legislation, substantial changes were made in the TIFIA credit program by expanding eligibility to include related projects that were grouped together. The goal of this program is to leverage limited federal resources and stimulate private capital investment in transportation infrastructure by providing credit assistance in the form of direct loans, loan guarantees, and standby lines of credit to projects of national or regional significance.

The State of New Hampshire applied and was approved for a TIFIA direct loan for the I-93 Corridor Projects in the spring of 2016. By using the TIFIA loan the Department will be able to pledge approximately \$19 - 20M in funds per year, for nine years, for resurfacing and the rehabilitation of rural state roads and red-listed bridges by deferring principal payments on the loan until 2026. Debt service for the TIFIA loan will be paid with proceeds from the gas tax increase in SB 367.

Operations & Maintenance for Federal-Aid Highways

As outlined in 23 CFR §450.216(m), the STIP must include financial information on revenues and expenditures to adequately operate and maintain Federal-aid highways. The estimates provided below represent all available funds to address regular maintenance and operation needs of the Federal-aid system in NH. The NHDOT asserts that the Federal-aid system in NH is adequately maintained through the maintenance and operations budget of

the Department and through the more substantial maintenance and preservation projects funded through specific state and Federal-aid categories.

**NHDOT Statewide Maintenance and Operating Budget
Source Agency Budget Submission 2019-2021**

2019	2020	2021	2022
Total Resources	Total Resources	Total Resources	Total Resources
Available	Available	Available	Estimated
\$142,593,208	\$140,559,096	\$142,848,468	*\$142,848,468

*Revenue estimates may change due to the 2020 COVID19 Pandemic.

Other Resources

The 2019-2022 NH STIP documents the amount of funds contributed by other sources to match Federal-aid funds for every project. Other sources of funds to match Federal-aid dollars are typically municipalities, but also include private entities, other public entities, and other states. Other sources of funds for projects in nonattainment or maintenance areas in the first two years of the STIP will be listed only if funding has been committed.

Public Involvement

The foundation of the transportation planning process is public involvement and the continuing, comprehensive and cooperative involvement of MPOs, Federal and State agencies and other stakeholders in the process. The MPOs and RPCs serve to facilitate public involvement at the local and regional levels, which augments the statewide transportation public involvement processes.

In NH the development of the Ten Year Plan (TYP), the LRTP and other planning documents are based on input from extensive public involvement efforts. The NH 2019-2028 Ten Year Plan included conducting twenty-six (26) which were attended by over 524 members of the public. The MPOs and RPC participated in these meetings and facilitated input from interested parties in their respective regions. Following the approval of the 10-Year Plan, the MPOs continue public outreach efforts, consistent with federal regulations, for the development of each MPOs TIP. The projects included in the first 4 years of the MPO TIP documents, collectively represent the projects included in the STIP. Each MPO conducted a public hearing and solicited public comments consistent with federal requirements. The NHDOT State STIP document was developed in conjunction with the MPO and further includes opportunity for public involvement and public comments. The STIP was subject to public review and comment, and public comment period was posted, a notice was posted in a statewide newspaper, on the internet and through each of the nine regional planning commissions.

STIP Revisions

On January 9, 2020 the NHDOT adopted the STIP Revision Procedures. The STIP Revisions procedures were developed in coordination with the MPOs, and were approved by FHWA and FTA. Those procedures outline thresholds and protocols for revisions to the STIP as amendments or administrative modifications. The STIP Revision Procedures will be revised on a periodic basis per changes in federal and state requirements, or at the request from the Interagency partners. Figure 3 below shows the anticipated STIP revision schedule for the calendar years 2019-2021.

Figure 3 – STIP Amendment Schedule

A01	April 2019	A04	April 2020
A02	October 2019		January 2021-STIP Update
A03	January 2020		

Performance Based Planning & Programming

The NHDOT's long range transportation plan (LRTP), ten year plan (TYP), Statewide Transportation Improvement Program (STIP), and Asset Management Plan have always supported the performance based planning focus areas identified in MAP-21/FAST Act. Specifically, pavement condition, bridge condition, traffic congestion, reliability, and air quality have always been focus areas for programming funding. The newly developed targets will provide a more consistent way to discuss and compare performance across the country, but they represent very little change for NHDOT other than reinforcing and clarifying expectations. As future versions of these Plans are developed, NHDOT will work to make explicit connections between projects and programs to the performance areas and targets that they are expected to impact. In those same plans, targets will be utilized to identify and discuss gaps between desired and observed performance.

This 2019-2022 STIP includes a summary chart that details how the projects identified in this STIP support the required performance categories outlined below:

Safety

- Number of fatalities
- Rate of fatalities per 100 million Vehicle Miles Traveled (VMT)
- Number of serious injuries
- Rate of serious injuries per 100 million Vehicle Miles Travelled (VMT)
- Number of non-motorized fatalities and non-motorized serious injuries

Pavement Condition

- Percentage of Pavements of the Interstate System in Good Condition
- Percentage of Pavements of the Interstate System in Poor Condition
- Percentage of Pavements of the Non-Interstate NHS in Good Condition
- Percentage of Pavements of the Non-Interstate NHS in Poor Condition

Bridge Condition

- Percentage of NHS Bridges Classified as in Good Condition
- Percentage of NHS Bridges Classified as in Poor Condition

Reliability/Congestion/Air Quality

- Percent of the Person-Miles Traveled on the Interstate That Are Reliable
- Percent of the Person-Miles Traveled on the Non-Interstate NHS That Are Reliable
- Truck Travel Time Reliability (TTTR) Index
- Annual Hours of Peak Hour Excessive Delay Per Capita: Urbanized Area 1
- Percent of Non-Single Occupancy Vehicle (Non-SOV) Travel: Urbanized Area 1
- Total Emission Reductions: CO

Transit

- Percentage of revenue vehicles exceeding Useful Life Benchmark (ULB)
- Percentage of non-revenue service vehicles exceeding Useful Life Benchmark (ULB)
- Percentage of facilities rated under 3.0 on the Transit Economic Requirements Model (TERM) scale
- Percentage of track segments under performance restriction

The performance areas of Safety, Pavement conditions, Bridge condition, Reliability/Congestion/Air Quality and Transit represent the relevant performance category groupings. All projects in the STIP have been associated with a *predominant* performance planning category that best meets with the project's intent, though the identified performance planning category associations do not represent the *only* performance planning benefits accrued by the projects identified.

More information regarding the performance targets identified and other NHDOT related performance based planning details are provided in the Transportation Performance Management State Biennial Performance Report for Performance Period 2018-2021 for New Hampshire, which is included in Appendix A.
